TANTRA / KUNDALI · SOURCE-AUDITED PRESENTATION

VERSION 2

# SWARNA SEKHAR DHAR

## JANMA KUNDLI & LIFE DOSSIER

Verified Calculations, Source Review & Method Status

**NOT FINAL DOSSIER**

**IMPORTANT STATUS**

**Event-level predictive validity: NOT ESTABLISHED.**
Historical back-testing produced a **NO-GO** result.
Astrological interpretations in this document are traditional/interpretive and should not be treated as empirically validated predictions.

BIRTH
1981-12-09 · 01:00:00 IST

PLACE
Berhampore, Murshidabad, West Bengal, India

CALCULATION
Lahiri (Chitrapaksha) · Whole-sign (bhava-chalit) for D1 interpretation; Placidus computed for KP cusps only

BUILD SCOPE
Core source-audited presentation only

Generated 2026-10-06T01:50:49+05:30

V2 · WAITING FOR HUMAN REVIEW

CONTENTS

# Table of Contents

This edition presents the verified calculation layer and the current source/method status. It does not present the final 1981–2053 year-wise dossier.

| Section | Page |
|---|---|
| 01 · Document Status & Warning | 3 |
| 02 · Birth Record & Calculation Basis | 4 |
| 03 · Evidence Legend & Methodology | 5 |
| 04 · D1 Chart & House Structure | 6 |
| 05 · Planetary Placements & Nakshatras | 8 |
| 06 · D9, D10 & D7 | 9 |
| 07 · Panchanga & Vimshottari | 10 |
| 08 · Jaimini Material & Node Separation | 11 |
| 09 · Method Audit Matrix | 13 |
| 10 · Ashtakavarga Source Audit | 15 |
| 11 · Kuja Source & Executor Audit | 17 |
| 12 · Historical Validation — NO-GO | 19 |
| 13 · Limitations & Open Research | 22 |
| 14 · Technical Appendix & Sources | 23 |

> **Reading rule.** A visible status label is part of the result. “SOURCE VERIFIED” does not mean “implemented”; “TRADITIONAL INTERPRETATION” does not mean “validated prediction”; “PARTIAL” and “UNRESOLVED” are active disclosures, not omitted work.

# 01 · Document Status & Warning

VERSION 2 · SOURCE-AUDITED EDITION

## NOT FINAL 1981–2053 LIFE DOSSIER

V2 is a controlled presentation of current evidence. It preserves incomplete methods instead of filling them with modern convention, arithmetic inference, or unsupported interpretation.

| HISTORICAL VALIDATION | ASHTAKAVARGA | KUJA PERSONAL VERDICT |
|---|---|---|
| NO-GO | PARTIAL | NOT COMPUTED |
| Event-level predictive validity is not established. | 4 of 7 production tables; SAV unreported. | Executor exists; authorized scope is empty. |

## Explicit exclusions from this build

- No yearly 1981–2053 prediction narrative.
- No final production dossier or replacement of the protected v5 PDF.
- No Mercury, Jupiter or Venus values added to production Ashtakavarga tables.
- No Sarvashtakavarga total calculated or reported.
- No personal Kuja/Manglik verdict and no chart-scope authorization.
- No completion of KP sub-lords, Tajika, D27, Nadi or unsupported Shadbala formulas.

**Required warning:** Event-level predictive validity: **NOT ESTABLISHED.** Historical back-testing produced a **NO-GO** result. Astrological interpretations in this document are traditional/interpretive and should not be treated as empirically validated predictions.

# 02 · Birth Record & Calculation Basis

## Birth record

| | |
|---|---|
| Subject | Swarna Sekhar Dhar |
| Local date | 1981-12-09 |
| Local time | 01:00:00 · Asia/Kolkata |
| Place | Berhampore, Murshidabad, West Bengal, India |
| UTC instant | 1981-12-08 19:30:00 UTC |
| Julian day UT | 2444947.3125 |

## Calculation basis

| | |
|---|---|
| Engine | pyswisseph (Swiss Ephemeris 2.10.03) |
| Ayanamsha | Lahiri (Chitrapaksha) · 23.604776° |
| Node convention | Mean node |
| House basis | Whole-sign (bhava-chalit) for D1 interpretation; Placidus computed for KP cusps only |
| Coordinates | 24.1044927 N · 88.2510635 E |
| Coordinate source | OpenStreetMap / Nominatim, query 'Berhampore, Murshidabad, West Bengal, India' |

**Data status.** The displayed values are read from the frozen calculation dataset. This presentation layer does not rederive planetary positions. The dataset's own historical-source metadata remains: `PENDING — HISTORICAL IMAGE VISION VALIDATION`.

## Primary calculated anchors

ASCENDANT
**Virgo**
13°53′ · Hasta pada 2

MOON
**Aries**

**Taurus**
Birth-time sensitive

VIMSHOTTARI START
**Venus**
Balance reference: 14.69 years

# 03 · Evidence Legend & Methodology

The report separates direct records, reproducible calculations, source-derived traditional rules, and interpretations. The label is part of each claim's meaning.

| Label | Meaning in this document |
|---|---|
| FACT | directly observed or documented |
| CALCULATION | computed from the birth record; reproducible |
| TRADITIONAL INTERPRETATION | classical Jyotish doctrine applied to this chart; not empirically validated |
| VALIDATED | independently reproduced by a separate computation |
| NOT VALIDATED | tested and found unsupported — see the NO-GO validation section |
| INFERENCE | reasoned from the above; not itself verified |
| PRACTICAL GUIDANCE | general consideration, not advice or guarantee |
| UNCERTAIN | contested, unverified, or dependent on an assumption |
| DOCUMENTARY EVIDENCE | from an official record or primary document |
| USER-SUPPLIED | stated by the subject; not independently corroborated |
| SOURCE VERIFIED | The inspected source passage or image is readable and citable; this does not by itself authorize production encoding. |
| NOT COMPUTABLE | The method or scope gate refuses a result rather than assuming missing rules. |
| USER-SUPPLIED | Stated by the subject; not independently corroborated. |

## Methodology overview

**A**
### Calculation data
Frozen JSON from the astronomy engine.

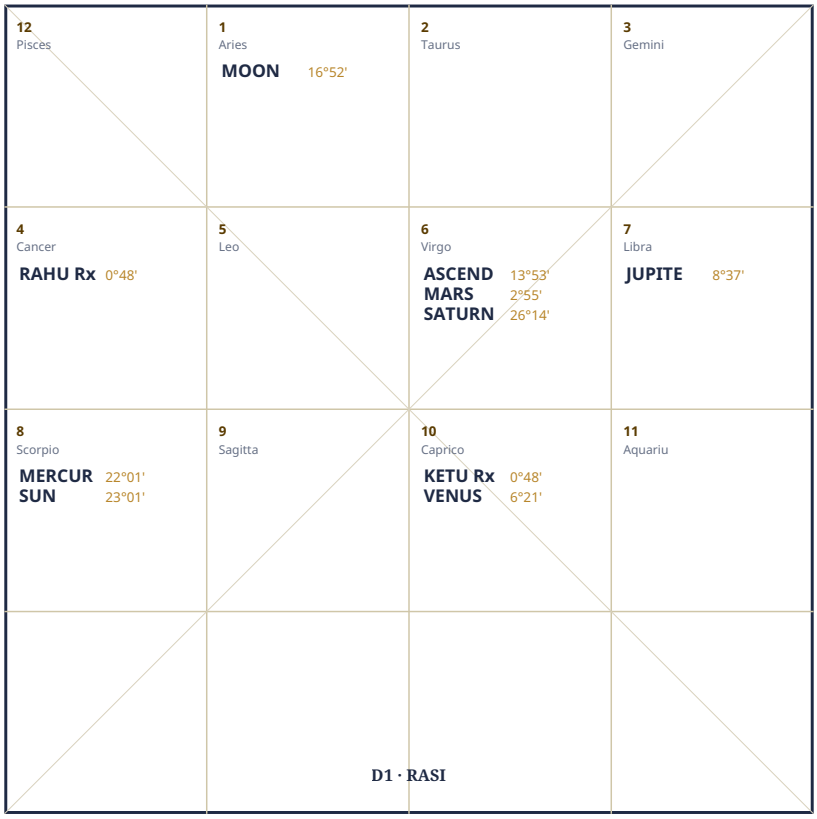

**B**
### Validation data
Independent comparisons and the NO-GO result.

**C**
### Source review
Classical passages and explicit unresolved fields.

**D**
### Presentation
Statuses are rendered; unsupported values are withheld.

> **Systems remain distinct.** Parashari, Jaimini, KP, Nadi and other traditions are not merged into one score in V2. A method audit is not a convergence claim.

# 04 · D1 Chart & House Structure

D1 / Rashi chart · sidereal Lahiri · Parashari whole-sign house presentation

## Ascendant

| | |
|---|---|
| Sign | Virgo |
| Degree | 13°53′ |
| Nakshatra | Hasta · pada 2 |
| Status | CALCULATION |

## House structure

Whole-sign houses are counted from Virgo Lagna. The house table below is a presentation of the stored house assignments, not a new cusp calculation.

| | |
|---|---|
| D1 status | VERIFIED |
| House comparison | 12/12 match in reference verification |

## Houses and occupants

| House | Sign | Stored occupants | Traditional domain |
|---|---|---|---|
| 1 | Virgo | Mars (Virgo), Saturn (Virgo) | self / body / direction |
| 2 | Libra | Jupiter (Libra) | resources / speech / family |
| 3 | Scorpio | Mercury (Scorpio), Sun (Scorpio) | effort / communication / skills |
| 4 | Sagittarius | — | home / foundations |

| House | Sign | Stored occupants | Traditional domain |
|---|---|---|---|
| 5 | Capricorn | Ketu (Capricorn), Venus (Capricorn) | learning / creativity / children |
| 6 | Aquarius | — | service / conflict / routine |
| 7 | Pisces | — | partnership / contracts |
| 8 | Aries | Moon (Aries) | shared resources / change |
| 9 | Taurus | — | dharma / higher study / teachers |
| 10 | Gemini | — | work / public action |
| 11 | Cancer | Rahu (Cancer) | gains / networks |
| 12 | Leo | — | expenditure / retreat |

# 05 · Planetary Placements & Nakshatras

CALCULATION Positions are displayed exactly from the current dataset; dignity words are traditional classifications stored by the engine, not empirical findings.

| Body | Sign | Degree | House | Nakshatra | Pada | Stored state |
|---|---|---|---|---|---|---|
| **Sun** | Scorpio | 23°01′ | 3 | Jyeshtha | 2 | Enemy's sign |
| **Moon** | Aries | 16°52′ | 8 | Bharani | 2 | Enemy's sign · Combust |
| **Mars** | Virgo | 2°55′ | 1 | Uttara Phalguni | 2 | Enemy's sign |
| **Mercury** | Scorpio | 22°01′ | 3 | Jyeshtha | 2 | Enemy's sign · Combust |
| **Jupiter** | Libra | 8°37′ | 2 | Swati | 1 | Enemy's sign · Combust |
| **Venus** | Capricorn | 6°21′ | 5 | Uttara Ashadha | 3 | Enemy's sign |
| **Saturn** | Virgo | 26°14′ | 1 | Chitra | 1 | Enemy's sign · Combust |
| **Rahu** | Cancer | 0°48′ | 11 | Punarvasu | 4 | n/a — lunar node has no classical dignity · retrograde |
| **Ketu** | Capricorn | 0°48′ | 5 | Uttara Ashadha | 2 | n/a — lunar node has no classical dignity · retrograde |

**Relevant reference separation.** Moon: Aries / Bharani pada 2. Sun: Scorpio / Jyeshtha pada 2. Mars: Virgo / Uttara Phalguni pada 2. Mercury: Scorpio / Jyeshtha pada 2. The same nakshatra fields are used in the Vimshottari source comparison.

# 06 · D9, D10 & D7

## D9 · Navamsa

VERIFIED

Lagna: **Taurus**

| Body | Sign | Deg. |
|---|---|---|
| Sun | Capricorn | 23°01′ |
| Moon | Virgo | 16°52′ |
| Mars | Capricorn | 2°55′ |
| Mercury | Capricorn | 22°01′ |
| Jupiter | Sagittarius | 8°37′ |
| Venus | Aquarius | 6°21′ |
| Saturn | Leo | 26°14′ |
| Rahu | Cancer | 0°48′ |
| Ketu | Capricorn | 0°48′ |
| **Ascendant** | **Taurus** | **13°53′** |

## D10 · Dasamsa

VERIFIED

Lagna: **Virgo**

| Body | Sign | Deg. |
|---|---|---|
| Sun | Aquarius | 23°01′ |
| Moon | Virgo | 16°52′ |
| Mars | Taurus | 2°55′ |
| Mercury | Aquarius | 22°01′ |
| Jupiter | Sagittarius | 8°37′ |
| Venus | Pisces | 6°21′ |
| Saturn | Capricorn | 26°14′ |
| Rahu | Cancer | 0°48′ |
| Ketu | Capricorn | 0°48′ |
| **Ascendant** | **Virgo** | **13°53′** |

## D7 · Saptamsa

VERIFIED

Lagna: **Gemini**

| Body | Sign | Deg. |
|---|---|---|
| Sun | Libra | 23°01′ |
| Moon | Cancer | 16°52′ |
| Mars | Pisces | 2°55′ |
| Mercury | Libra | 22°01′ |
| Jupiter | Sagittarius | 8°37′ |
| Venus | Leo | 6°21′ |
| Saturn | Virgo | 26°14′ |
| Rahu | Capricorn | 0°48′ |
| Ketu | Cancer | 0°48′ |
| **Ascendant** | **Gemini** | **13°53′** |

**Birth-time sensitivity.** D9 and other varga placements are shown as verified calculations against the current reference comparison. Their use in any later interpretation must carry the documented birth-time sensitivity; V2 does not turn them into predictive evidence.

# 07 · Panchanga & Vimshottari

## Panchanga at birth

| | |
|---|---|
| Civil weekday | Wednesday |
| Tithi | Shukla Dwadashi |
| Nakshatra | Bharani · pada 2 |
| Nakshatra lord | Venus |
| Yoga | NYoga 19 |
| Karana | Balava |
| Sunrise | 06:07 IST |

## Field-level caveats

Civil and ephemeris weekday divisions differ by one offset convention; the civil weekday is used throughout.

**Reference comparison:** the independent record and the supplied reference differ on weekday convention and yoga naming. The stored independent values are shown without silently replacing them.

**Sunset:** not computed — swisseph rise/set constants are swapped in this build and no validated alternative was available.

## Vimshottari sequence

VERIFIED Moon nakshatra Bharani, pada 2; reference balance at birth 14.69 years for Venus. The independently reproduced sequence is displayed below.

| Mahadasha lord | Start | End | Years |
|---|---|---|---|
| **Venus** | 1976-08-18 | 1996-08-18 | 20 |
| **Sun** | 1996-08-18 | 2002-08-18 | 6 |
| **Moon** | 2002-08-18 | 2012-08-18 | 10 |
| **Mars** | 2012-08-18 | 2019-08-18 | 7 |
| **Rahu** | 2019-08-18 | 2037-08-18 | 18 |
| **Jupiter** | 2037-08-18 | 2053-08-18 | 16 |
| **Saturn** | 2053-08-18 | 2072-08-18 | 19 |

Vimshottari Mahadasha · 1981–2053

# 08 · Jaimini Material & Node Separation

## Jaimini karaka schemes

### 7-karaka comparison scheme VERIFIED

| Karaka | Planet |
|---|---|
| AK | Saturn |
| AmK | Sun |
| BK | Mercury |
| MK | Moon |
| PK | Jupiter |
| GK | Venus |
| DK | Mars |

### 8-karaka production scheme

SCHEME-DEPENDENT

| Karaka | Planet |
|---|---|
| AK | Rahu |
| AmK | Saturn |
| BK | Sun |
| MK | Mercury |
| PiK | Moon |
| PK | Jupiter |
| GK | Venus |
| DK | Mars |

## Arudha / key outputs

| | |
|---|---|
| 8-karaka Atmakaraka | Rahu |
| 8-karaka Karakamsha | Cancer |
| Darakaraka | Mars |
| Upapada Lagna | Scorpio |
| AL | Capricorn |
| A7 | Taurus |
| A10 | Aries |
| A11 | Libra |

**Scheme distinction.** The difference is a SCHEME difference, not an error. The reference uses the classical 7-karaka scheme (Sun..Moon, node excluded); the production engine uses the 8-karaka Jaimini scheme where Rahu is measured in reverse (30 - 0.8076 = 29.1924) and therefore takes AK, shifting every other karaka down one slot. Under the 7-karaka scheme the independent result reproduces the reference exactly for AK, AmK, BK, MK. Both schemes are reported; neither is discarded.

## Mean-node and true-node separation

| Node result | Sign / degree | House | Use |
|---|---|---|---|
| Mean Rahu | Cancer · 0°48′ | 11 | Parashari |
| True Rahu | Gemini · 29°22′ | 10 | Krishnamurti Paddhati |

The mean node moves backwards along the ecliptic at ~19.3°/year while the true node moves irregularly; over the interval between the two osculating positions they differ by more than a sign here. Mean Rahu falls in the 11th house from a Virgo lagna, true Rahu in the 10th. BOTH are computed and kept separate - neither overwrites the other.

# 09 · Method Audit Matrix

This matrix is the V2 control surface. “Production use” means what the report is allowed to show, not that every method is predictive.

| Method | Status | Source / validation | Production use in V2 |
|---|---|---|---|
| **D1 / planetary positions** | VERIFIED | Independent calculation; 9/10 within 2′; Jupiter discrepancy checked by JPL Horizons. | Core chart values |
| **House structure** | VERIFIED | Parashari whole-sign; all 12 houses match the reference comparison. | D1 presentation |
| **D9 Navamsa** | VERIFIED | Independent recalculation; Taurus Lagna matches reference; birth-time sensitive. | Presented, not used as standalone proof |
| **D10 Dasamsa** | VERIFIED | Independent recalculation; Virgo Lagna matches reference. | Presented |
| **D7 Saptamsa** | VERIFIED | Independent recalculation; Gemini Lagna matches reference. | Presented |
| **Panchanga** | VERIFIED · CAVEATS | Independent birth-instant calculation; reference convention differences are retained. | Displayed with field-level notes |
| **Vimshottari** | VERIFIED | Independent sequence and balance; Venus balance 14.6916 y vs reference 14.69 y. | Sequence only in V2 |
| **Jaimini** | VERIFIED · SCHEME-DEPENDENT | 7-karaka result reproduces reference; production also records an 8-karaka scheme with Rahu. | Both schemes disclosed |
| **Ashtakavarga** | PARTIAL | 4 of 7 BAV tables verified; Mercury/Venus source-verified but not encoded; Jupiter unresolved. | Verified rows only; SAV withheld |
| **Shadbala** | PARTIAL | Components exist in project code; classical formulas/ minima lack a frozen citable edition; Drik Bala disclosed as 0.0. | Disclosure only; not fully source-verified |
| **KP** | PARTIAL | True-node result retained; house cusps and sub-lords are not computed. | No KP verdict |
| **Tajika** | NOT COMPUTED | No verified Tajika calculation in the current engine. | None |
| **D27 / Bhreshta** | NOT IMPLEMENTED | The 16-varga set is incomplete at D27. | None |
| **Nadi** | NOT COMPUTED · DEFAULT-DENY | Named variants lack the required named lineage, deterministic procedure, citable source and rules. | None |
| **Kuja / Manglik** | SOURCE FROZEN · EXECUTOR IMPLEMENTED | BPHS Ch. 80 v.47 image witness; production scope remains empty. | No personal verdict |
| **Historical validation** | NO-GO / NOT VALIDATED | Life-event back-test, null control and rank test. | Limitation, not a prediction |

**Global validation boundary.** The calculation layer can be verified against source data or independent recomputation. That does not validate the traditional interpretation as a prediction. The historical event test below is explicitly NO-GO.

# 10 · Ashtakavarga Source Audit

ASHTAKAVARGA · P1A SOURCE-FIRST GATE

**PARTIAL** · **SAV UNREPORTED**

4 of 7 planetary tables are verified against their published totals (Mars=39, Moon=49, Saturn=39, Sun=48). Remaining tables (Mercury, Jupiter, Venus) are not confirmed and were not fitted to their checksums, so the Sarvashtakavarga total is NOT reported: a partial sum is not the classical 337 and would be misleading.

## Verified production BAV tables

These are the four tables currently retained in production. Values are displayed from the frozen calculation dataset and are not expanded into a complete SAV.

| Target | Ari | Tau | Gem | Can | Leo | Vir | Lib | Sco | Sag | Cap | Aqu | Pis | Total |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| **Sun** | 3 | 3 | 7 | 6 | 4 | 5 | 3 | 2 | 5 | 2 | 4 | 4 | **48** |
| **Moon** | 4 | 5 | 5 | 5 | 3 | 5 | 4 | 5 | 0 | 6 | 5 | 2 | **49** |
| **Mars** | 4 | 1 | 5 | 4 | 3 | 7 | 1 | 2 | 3 | 2 | 2 | 5 | **39** |
| **Saturn** | 1 | 1 | 5 | 4 | 5 | 4 | 2 | 5 | 2 | 3 | 6 | 1 | **39** |

## Reference context only

| Target | Documented expected total | Production |
|---|---|---|
| Sun | 48 | retained |
| Moon | 49 | retained |
| Mars | 39 | retained |
| Mercury | 54 | excluded |
| Jupiter | 56 | excluded |
| Venus | 52 | excluded |
| Saturn | 39 | retained |

The expected seven-table totals sum to 337, but that reference total is not calculated here.

## Unresolved source state

### Mercury BAV SOURCE VERIFIED · NOT ENCODED

Readable contributor row; source total 54; production table remains excluded.

BPHS Ch. 66 vv. 51–52; PDF 367–368 / printed pp. 858–859; P1A_SOURCE_VERIFICATION.md

### Venus BAV SOURCE VERIFIED · NOT ENCODED

Readable contributor row; source total 52; production table remains excluded.

BPHS Ch. 66 vv. 56–58; PDF 370–371 / printed pp. 861–862; P1A_SOURCE_VERIFICATION.md

### Jupiter BAV UNRESOLVED

4th-house contributor list is UNREADABLE_FROM_SOURCE_IMAGE; no arithmetic completion was made.

BPHS Ch. 66 vv. 53–55; PDF 368–369 / printed pp. 859–860; P1A_SOURCE_VERIFICATION.md

**277-vs-337:** unresolved. No row was reconstructed from the aggregate or from arithmetic.

**Hard rule.** SAV is not reported. The partial verified-table column sum is not the classical SAV, and classical SAV strength bands do not apply to it.

# 11 · Kuja Source & Executor Audit

SOURCE GATE

## KUJA FORMATION RULE FROZEN · EXECUTOR IMPLEMENTED

Production chart scope is default-deny: `AUTHORIZED_SCOPES = ()`.

### Source evidence

**BPHS Ch. 80 v.47**
Girish/Chatur Vol. II, PDF index page 712, printed page 692.

> लग्ने व्यये सुखे वाऽपि सप्तमे वाऽष्टमे कुजे ।
> शुभदृग्योगहीने च पति हन्ति न संशयः ।।४७।।

The image-level reading of **लग्ने** is high confidence (20/21 OCR passes). It establishes the 1st-house term.

### Frozen specification

KUJA_FORMATION_HOUSES

**{1, 4, 7, 8, 12}**

from Lagna

- Benefic-free clause belongs to formation.
- v.49 mutual-match cancellation remains separate.
- Strength: UNSPECIFIED_BY_SOURCE.
- Orb: UNSPECIFIED_BY_SOURCE.

## Source discrepancy and exclusions

The inspected Sanskrit witness contains **लग्ने**; the Santhanam English rendering does not explicitly reproduce the 1st-house term. The reason for the discrepancy remains unestablished. This is recorded neutrally and Santhanam is not silently corrected.

| Feature | Current status |
|---|---|
| 2nd house | NOT SUPPORTED |
| Moon / Venus reference points | NOT SUPPORTED |
| Numerical orb | UNSPECIFIED BY SOURCE |
| Severity scale | NOT SUPPORTED |

| Feature | Current status |
|---|---|
| Additional bhanga rules | NOT INTRODUCED |
| Executor | IMPLEMENTED · uses authoritative whole-sign house helper |
| Production scope | `AUTHORIZED_SCOPES = ()` · default-deny |
| Personal Kuja verdict | NOT COMPUTED |

**Personal Kuja status:** NOT COMPUTED. This document does not state that Swarna is Manglik or non-Manglik. No chart scope was inferred from sex, modern convention, calculator behavior or the wording of one translation.

# 12 · Historical Validation — NO-GO

**NO-GO**

**Event-level predictive validity: NOT ESTABLISHED.**
Event-level predictive validity: NOT ESTABLISHED. Historical back-testing produced a NO-GO result. Astrological interpretations in this document are traditional/interpretive and should not be treated as empirically validated predictions.

ABSOLUTE TEST
**3 / 12 / 3 / 2**
MATCH · PARTIAL · WEAK · NO MATCH

NULL BASE RATE
**80.5%**
MATCH+PARTIAL in 1,022 arbitrary category-years

RANK MEDIAN P
**0.500**
Exactly chance; 0/20 events in top decile

BOTTOM DECILE
**3 / 20**
Events landed in the null's bottom decile

## Null control and rank test

### Null control

57.9% of all 876 house-years score at or above the activation floor of 2, and the median house scores exactly 2, so MATCH/PARTIAL is the default outcome rather than a signal.

**1022** arbitrary category-years were tested.

### Rank test

Median p is exactly chance. Three of twenty event years fall in the BOTTOM decile — the model points mildly away from events it should have caught.

Best single p: **0.167**; expected hits by chance: **2.0**.

## Event-level matrix

| ID | Year | Event | Verdict | Houses | p(rank) |
|---|---|---|---|---|---|
| E01 | 1998 | — | PARTIAL | [4, 5, 9, 12] | — |
| E02 | 2005 | — | WEAK | [4, 5, 9, 11] | — |
| E03 | 2006 | — | WEAK | [4, 9, 10] | — |
| E04 | 2008 | — | PARTIAL | [4, 5, 9, 12] | — |
| E05a | 2008 | — | PARTIAL | [9, 12] | — |
| E05b | 2009 | — | PARTIAL | [9, 12] | — |
| E05c | 2010 | — | PARTIAL | [9, 12] | — |
| E05d | 2011 | — | MATCH | [9, 11] | — |
| E06a | 2015 | — | MATCH | [7, 11] | — |
| E06b | 2015 | — | WEAK | [7, 2, 12] | — |

| ID | Year | Event | Verdict | Houses | p(rank) |
|---|---|---|---|---|---|
| E06c | 2015 | — | NO MATCH | [6, 12, 10] | — |
| E07 | 2018 | — | PARTIAL | [7, 11] | — |
| E08 | 2018 | — | NO MATCH | [9, 10] | — |
| E09 | 2019 | — | PARTIAL | [5, 4, 9] | — |
| E10 | 2021 | — | PARTIAL | [5, 4, 9] | — |
| E11 | 2021 | — | PARTIAL | [4, 5, 9, 12] | — |
| E12 | 2024 | — | MATCH | [9, 10] | — |
| E13 | 2024 | — | PARTIAL | [4, 2, 12, 3] | — |
| E14a | 2026 | — | PARTIAL | [2, 6, 10, 12] | — |
| E14b | 2026 | — | PARTIAL | [2, 6, 10, 12] | — |
| E15 | historical (exact dates UNVERIFIED) | — | UNTESTABLE | [2, 6, 10, 12] | — |

## Contradictions and protocol boundary

| Claim | Observed evidence | Status |
|---|---|---|
| 2024 indicates family separation | 2nd house activation 0, 12th activation 1 in that year | NOT VALIDATED |
| 2026 indicates a career interruption | 10th house activation 0 in that year | NOT VALIDATED |
| the 9th house tracks qualification | the year the qualification obstruction ENDED carries the highest 9th score; the first-class year (2005) is among the weakest | NOT VALIDATED |
| the 9th house tracks the father | 9th activation is 1 in the 2006 surgery year and in both candidate death years alike — it does not separate them | NOT VALIDATED |

**Documentary conflict.** Father's death year remains unresolved: 2018 is family recollection; 2019 is an uninspected official claim. Astrology is not used to adjudicate that documentary fact.

**Protocol caveat:** The original frozen prediction file was written before the event data existed. A later regeneration happened AFTER the event file had been read, so it does not independently carry that guarantee. Its integrity rests on a diff showing the change is confined to two documented geometry/loop defects, with no value altered for a reason that could know an outcome. Both files are retained.

# 13 · Limitations & Open Research

## Open research gates

| Item | Status | What remains unresolved |
|---|---|---|
| Ashtakavarga P1A | PARTIAL | Jupiter 4th-house contributor list; complete source freeze before any new production row or SAV. |
| Shadbala | PARTIAL | Citable formula source, component examples and Drik Bala implementation/ source freeze. |
| KP | PARTIAL | House cusps and sub-lords are not computed. |
| Tajika | NOT COMPUTED | No verified calculation is available. |
| D27 / Bhreshta | NOT IMPLEMENTED | One of the 16 varga divisions remains absent. |
| Nadi | DEFAULT-DENY | No named deterministic lineage, citable source and declared rules for a computable variant. |
| Father's death record | NOT YET VERIFIED | Official documentary inspection is still required; the chart cannot settle it. |
| Historical source imagery | PENDING | The calculation dataset carries a pending historical-image validation metadata field. |

## What V2 deliberately does not claim

- It does not claim empirical predictive power.
- It does not use the current method matrix as a score.
- It does not use partial Ashtakavarga totals as strength bands.
- It does not use traditional interpretations to resolve documentary facts.
- It does not convert a registered source rule into an authorized personal verdict.

> **Human review gate.** This is the stopping point requested for Version 2. Further content expansion or a final PDF requires human review of this source/status presentation.

# 14 · Technical Appendix & Sources

## Repository and protected baseline

| | |
|---|---|
| **Input branch** | feat/kundali-html-render-architecture |
| **Input commit inspected** | `bb2b02d95ad489543bfec8f450d70d15ae9c0713` |
| **User checkpoint supplied** | `51812d5` |
| **Protected v5 SHA-256** | `bdecf2a6bcb2884d575c9f817312eaa5f14bff7aeba436536362b495614d4ca3` |
| **Current regression** | **83/83 PASS** (run during this build) |
| **AV_TABLES** | **UNCHANGED** · Sun, Moon, Mars, Saturn only |
| **SAV** | **UNREPORTED** |
| **Personal Kuja evaluation** | **NOT RUN** |
| **Final 1981–2053 dossier** | **NOT GENERATED** |

The inspected repository was ahead of the user-supplied 51812d5 checkpoint by source-audit documentation commits. V2 records the actual input commit rather than mislabelling it.

## Source register

- `docs/kundali/out/kundali_data.json` — frozen calculation dataset
- `docs/kundali/out/reference_verification.json` — independent comparison and dashboard
- `docs/kundali/methods/sources/ashtakavarga_source.json` — P1A source gate
- `docs/kundali/sources/P1A_SOURCE_VERIFICATION.md` — Mercury/Venus/Jupiter image review
- `docs/kundali/sources/KUJA_IMAGE_SOURCE_REVIEW.md` — BPHS Ch. 80 image evidence
- `docs/kundali/sources/KUJA_EXECUTOR_IMPLEMENTATION.md` — executor and default-deny scope
- `docs/kundali/Life_Event_Validation_Report.md` — NO-GO validation record
- `docs/kundali/out/kundali_1981_2053_v5.pdf` — protected baseline

# Build and QA contract

### Build artifacts

- Dedicated V2 HTML source in `out/v2/`.
- Dedicated V2 PDF preview in `out/v2/`.
- Copied SVG assets are limited to D1, D9, D10, D7 and Vimshottari timeline.
- Source/status manifest records input hashes and protected-state declarations.

### QA checks

- TOC resolved in two stable render passes.
- Required warnings and status labels present in PDF text.
- Charts, fonts, tables and PDF geometry checked programmatically.
- No SAV value is presented as calculated; no personal Kuja verdict is present.

**VERSION 2 PREVIEW — HUMAN REVIEW REQUIRED**
Source-audited presentation complete; final dossier intentionally not generated.
